

The Single Most Comprehensive Case-Law Study on Persons in the Internal Market – and on the Spin of interpretive formulas

The Greatest Possible Freedom

Interpretive formulas and their spin
in free movement case law

By Prof. Dr. Thomas Burri, LL.M. (Bruges)

2015, 606 pp., hc., € 129.00

The book entitled 'The Greatest Possible Freedom' tells the story of natural persons in the internal market. The first part contains a thick chronological description of the case-law of the Court of Justice of the European Union on free movement of persons and services, including the hitherto largely neglected coordination of social security. In this sizeable body of case-law including roughly 1400 decisions the book then traces the evolution and spin of certain interpretive formulas. Broad formulas like

the greatest possible freedom or coordinative formulas like *simple coordination* are thus examined and their almost eerie power comes to light.

Both practitioners representing clients in the internal market and academics interested in the internal market or interpretation more generally will likely find the book an essential read.
